AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (Previously Presented) A core for roofing and sealing membranes, comprising a reinforcement-free, bonded non-woven of polyester filaments which is bound by a binder and which has a latent shrinkage force of 2 N/5 cm to 20 N/5 cm.
2. (Previously Presented) The core according to claim 1, characterised in that the non-woven is bonded mechanically by means of needles.
3. (Previously Presented) The core according to claim 1, characterised in that the non-woven is bonded hydrodynamically.
4. (Previously Presented) The core according to claim 1, characterised in that the nonwoven is bonded thermally.
5. (Canceled)
6. (Previously Presented) The core according to claim 1, characterised in that the shrinkage force is 6 N/5 cm to 10 N/5 cm.
7. (Previously Presented) The core according to claim 1, characterised in that the non-woven is a non-woven of polyethylene terephthalate filaments.
8. (Currently Amended) A method of producing a reinforcement-free non-woven core of polyester filaments which is suitable as a core for roofing and sealing membranes,

Attorney's Docket No. 7333Application No. 10/577,889

characterised in that a non-woven of polyester filaments is produced by the spun-bond process, the non-woven obtained in this way is bonded, is provided with a binder, is dried in a dryer and is stretched on a stretching unit positioned downstream of a dryer to an extent such that the non-woven has a shrinkage force ~~which counteracts the strains which arise in the subsequent treatment operations which take place under heat, the shrinkage force being~~ in a range from 2 N/5 cm to 20 N/5 cm.

9. (Canceled)
10. (Previously Presented) Method according to claim 8, characterised in that shrinkage force is in a range from 6 N/5 cm to 10 N/5 cm.
11. (Previously Presented) Method according to claim 9, characterised in that the non-woven of polyester filaments is a non-woven of polyethylen terephthalate.
12. (Previously Presented) Method according to claim 8, characterised in that for bonding the non-woven is needle-punched and passed through a calender.
13. (Previously Presented) A composite material comprising a core for roofing and scaling membranes, wherein the core comprises a reinforcement-free, bonded non-woven of polyester filaments which is bound by a binder and which has a latent shrinkage force of 2 N/5 cm to 20 N/5 cm.
14. (Previously Presented) A roofing or sealing membrane[[s]] comprising a core for roofing and scaling membranes. wherein the core comprises a reinforcement-free, bonded non-woven of polyester filaments which is bound by a binder and which has a latent shrinkage force of 2 N/5 cm to 20 N/5 cm.
